
Zinco Green Roof Systems Ltd

systems and components for roof ... - zinco-greenroof - overlap, are suitable for simple extensive green roof areas. in general the material compatibility of the root barrier and the water-proofing has to be taken into account. zinco root barriers wsf 40 and wsb 100-po are compatible with bitumen. high-pressure polyethylene sheet, solid and with high tensile strength, for application **planning guide system solutions for intensive green roofs** - at zinco, intensive green roofs are installed in accordance with standards and with system. our six principles at a glance: • the system build-up is tailored to suit each roof. • the system build-up ensures permanent drainage, even under load. • the system build-up provides for a good water/air balance. **planning guide system solutions for intensive green roofs** - zinco intensive green roofs are installed in accordance with current standards. our six principles at a glance: • the system build-up is tailored to suit each roof. • the system build-up ensures permanent drainage, even under load. • the system build-up provides for a good water/air balance. • the system build-up is adapted to suit **planning guide system solutions for sloped green roofs** - ®with zinco georaster 6 green roof solutions for sloped roofs 8 intensive green roof on sloped roofs 9 material variations on sloped roofs 10 greening barrel roofs choice of plants 11 please see our planning guides : • “system solutions for intensive green roofs” • “system solutions for extensive green roofs” for more information. **planning guide system solutions for extensive green roofs** - zinco extensive green roofs are installed in accordance with current standards and with system. our six principles at a glance: each roof. drainage, even under load and with a low pitch. ~ ~ water/air balance. the required type of vegetation. ^ ^ ” and upkeep to a minimum. ~ ~ green roof life. cold all the information regarding **planning guide system solutions for thriving green roofs** - by the plant type, the geographical region and the roof itself. besides building the correct green roof system to support the plants, it is very important to protect the water-proofing from both mechanical damage and attack from plant roots. zinco systems provide a number of solutions to these problems. zinco green roof systems have **wind uplift calculations vegetated roofs - zinco canada** - step 3: green roof assembly design the green roof assembly must be designed to meet the 50 year event under worst case (dry) conditions. the growing medium provides the majority of this weight. the zinco green roof systems are extremely flexible in design and installation and can be tailored specifically to the wind uplift calculation require- **planning guide solar energy and green roofs - zinco canada** - the zinco solar base adds a significant new benefit: the integration of solar en-ergy use into the green roof build-up. the function of a green roof as an ecological compensation area is, therefore, fully maintained with solar base, which is incorporated into the solarvert® system build-up. **planning guide system solutions for extensive green roofs** - zinco fallnet® - non-roof penetrating fall arrest system 12 system build-up “solarvert®” 13 details and accessory programme 14 european technical assessment 15 please see our planning guide “systems for pitched green roofs” for information on pitched and steep pitched green roofs. **specification suggestion roof garden with ... - zinco canada** - specification suggestion “roof garden” with floradrain® fd 60 p a g e | 1 zinco canada inc. - p.o. box 29 - carlisle - ontario ... information about the zinco green roof systems. it has to be clear, that the information that is shown must be understood as guide and ... **planning guide green roof 4 - zinco** - more options with zinco system build-up “stormwater management roof” 4 stormwater retention with a green roof system build-up 8 “urban climate roof” system build-up with maximum evaporation capacity system build-up “irrigated extensive green roof” 12 the system build-up for biodiverse green roofs in regions with extended periods of ... **green roofs/eco-roofs - university of florida** - green roofs/eco-roofs definition: a green roof or eco-roof is a planted roof top that provides benefits of water harvesting, stormwa-ter management, energy conservation, pollution abatement, and aesthetic value. green roofs vary in depth of growing media, types of plants (climate-dependent), infrastructure, and intended use. objectives: **planning guide system solutions for intensive green roofs** - system build-up “roof garden” the “roof garden” green roof system is a multifunctional green roof build-up with high water storage. it is suitable for lawns, perennials, and with deeper system substrate, for shrubs and trees. integration with hard landscapes, for example, walkways, terraces, driveways or play areas, etc. is also possible. **system data sheet “sedum carpet” with floradrain fd 25-e** - roof construction with root resistant waterproofing 67 2 84 10 weight kg/m² dry water saturated 60 30 height mm • proven simple green roof build-up re-quiring only little maintenance, especially for roofs with low design demands. • can be used on roofs with no severe ponding up to a slope of about 8°. **green roofs on inverted roof assemblies - zinco canada** - greenroof@zinco · zinco green roofs on inverted roof assemblies information sheet subject to technical alterations and printing errors • first edition 01/2001; revised 01/2012 with inverted green roof assemblies the insulation is positioned on top of the waterproofing. because the insulation is exposed to moisture, only extruded
